

Cooperative Research Centres Projects (CRC-P) – Participant Declaration

This declaration is to be completed by each participant contributing to the collaborative project for 'Overcoming Pimelea weed toxins'.

- I declare that (subject to this application being successful) the participant will support and actively participate in the proposed Project.
- I declare the proposed contribution has been endorsed by the participant or a person with authority to commit the participant to the proposed CRC Project.
- I declare that the participant will contribute (subject to the project application being successful) the funds and other resources, within the annual periods indicated below:

	2017-18	2018-19	2019-20	Total
Cash				
In-kind labour (days/year)				
Value of in-kind labour (\$38/hr or \$300/day)				
Other in-kind (value, if applicable)				
Description of other in-kind				
Total				

- I declare that the information contained in this declaration relates to my entity, is to the best of my knowledge, true, accurate and complete.
- I declare that I am authorised to sign and submit this declaration on behalf of the participant.
- I approve of the information in this application being communicated to the Department in electronic form.

By signing below, I agree to the above declaration and confirm all of the above statements to be true.

Pledge time for Pimelea toxin research project

We invite everyone concerned about the impact of Pimelea plant poisoning on cattle to join a collaborative project application now to raise funds for possible solutions.

Industry, researchers, producers and businesses are coming together to back a research project examining how to combat this toxic weed through rumen detoxification and improved best management of this seasonal weed affecting inland Australia.

To ensure this project is funded, we need industry support and matching dollars for our research grant application to government's AusIndustry. Our goal is to establish a \$1million project over 3 years. Funding guidelines require an industry, research organisation and small to medium enterprises to jointly lodge the application. Potential project partners, to date, include the University of Queensland, AgForce, Queensland Alliance for Agriculture and Food Innovation and Queensland's Future Beef extension team.

Please use this form to pledge cash or in-kind. We need to collectively raise up to \$500,000 from industry and partners to co-match the government grant. Companies may be entitled to a 45 per cent tax offset rebate for contributions to R&D. Individual producers and trusts may be willing to contribute the cash proceeds from the sale of one or more livestock or similar. In-kind contributions may be for activities such as voluntary labour to collect Pimelea plant samples, access to livestock for rumen samples, use of paddocks for a trial, helping with best practice field trials or hosting a field day.

To join the Pimelea communication network or for more information, contact AgForce by emailing agforce@agforceqld.org.au, ph 07 3236 3100, fax 07 3236 3077 or AgForce Queensland, PO Box 13186, Northbank Plaza, George St, Brisbane Q 4003.

Please return signed pledges to AgForce before the 16th March 2017.

The application to Australian Government for a co-matching grant closes on 22nd March 2017.
